

5-finger-glove made of Sebatan®-leather and Preox-Aramid fabric | aluminized

JUTEC®-Item number:
H05LA238-W2

This glove made of heat-resistant brown Sebatan-Leather and with flexible aluminum coating on a Preox-Aramid fabric on the outside surface of the handle among other things designed for easy welding with emerging radiation heat.

The Sebatan®-Leather won't also be hard due to the heat and retains its good properties.

Application area: welding, foundries, metal industry, shipbuilding, etc.

- CE CAT III EN 407, EN 388
- Abrasion resistant
- Flexible aluminum coating
- Soft
- Best handling
- Length approx. 380 mm
- Other lengths available
- Sizes: 09, 10, 12 available
